📁 PROFESSIONAL EXPERIENCE

Shanghai Dewu Information Group Co., Ltd. (Brand: Poizon App) 02/2026 – 05/2026 | Shanghai
Strategy Operations Intern
- Track and monitor core business metrics including GMV of Outdoor & Sports Division; extract and aggregate industry indicator data via SQL to support business decision-making
- Participated in Spring New Product Launch and Blue Ocean strategic projects, conducted targeted analysis on price fluctuation and user conversion, delivered data insights and operational optimization suggestions
- Conducted competitive pricing research and price band comparison on Xiaohongshu hot commodities to provide data support for merchandise pricing, price competitiveness improvement and category competition strategy formulation
- Assisted in establishing the business data analysis system and developing data visualization dashboards, boosting efficiency of indicator monitoring and abnormal early warning; delivered commercial strategies covering supply allocation and traffic conversion to drive revenue growth

BDO China Shu Lun Pan Certified Public Accountants LLP Zhejiang Branch 01/2025 – 04/2025 | Hangzhou
Audit Intern
- Prepared audit working papers for monetary funds, fixed-assets and employee compensation accounts; inspected more than 800 accounting vouchers with zero material misstatement, supported audit evidence aggregation and senior auditor review procedures.
- Completed physical inventory of fixed assets for 3 enterprises, categorized assets and finalized fixed asset inventory confirmation forms
- Conducted asset valuation work through fixed asset inventory and classification methods, analyzed asset utilization efficiency and return on investment ratios to support investment decision-making
- Collaborated with audit seniors to cross-verify supporting documents, flagged potential accounting inconsistency risks; standardized sorting & indexing of physical inventory files to shorten team review turnaround time.

Orient Securities, Investment Research Intern 07/2024 – 08/2024 | Shanghai
- Monitored and analyzed daily trends of major market indices (CSI 300, STAR 50), tracked real trading accounts independently and optimized investment strategies, lifting research efficiency of stocks & index funds by 20%
- Supported portfolio allocation for fund managers and evaluated investment returns; drafted roadshow and field research reports to offer logical basis for investment decisions
- Joined on-site investigations of listed companies and public/private fund institutions, drafted 2 roadshow presentation decks and 1 field research reports on listed companies, providing clear logical justifications for final investment decisions.

📁 PROJECTS

Nanyang Technological University Summer School, Introduction to Data Science & AI 06/2025 – 07/2025
- Achieved perfect scores on two course assessments (A); participated in AI4X 2025 conference
- Completed research project "Spam Detection Research Based on Machine Learning": Performed EDA on email datasets via correlation heatmaps and feature visualization, built word-frequency-based features capturing spam-specific symbolic and promotional markers. Trained multiple ML models including Random Forest (95.6% accuracy), validated performance with 10-fold cross-validation (0.947 F1-score) and analyzed feature importance to enhance model interpretability.

HSBC "Financial Lab" Training Program, Wealth Management Specialist Track 05/2024 – 06/2024
- Researched asset allocation models and designed personalized investment portfolios to balance return and risk; mastered cash flow management and risk appetite assessment methodologies
- Completed family wealth simulation sandbox exercises to analyze household financial demands across life cycles and dynamically adjust allocation ratios of stocks, bonds and other assets
